

What was delivered: a secure, mobile-friendly **online membership intake form** that lets prospective members complete their application and upload supporting documents from any device — replacing the manual, print-and-scan PDF process. It is brand-matched to Heritage Hub FCU and ready to plug into the credit union's website.

1 WHAT THE FORM DOES

- **Two applications in one link** — a one-click toggle between a **Simple (single-owner)** membership and a **Full business** application with beneficial-ownership & BSA details.
- **Complete data capture** — business info, owners/control person, authorized signers, eligibility, account selection, beneficiaries, and required disclosures.
- **Built-in guidance & validation** — required fields, live progress bar, and formatting for EIN, SSN, phone, and dates reduce incomplete submissions.
- **Document upload (8 categories)** — EIN letter, formation/DBA certificate, ID, resolution, and more. **Accepts every file type** (PDF, HEIC, JPG, Word...).
- **Phone-camera capture** — applicants can photograph documents directly, or pick files/photos, or drag-and-drop on desktop.
- **Legally-adopted e-signature** — sign by drawing or typing, with an E-SIGN / UETA adoption statement and a captured audit trail.

2 KEY CAPABILITIES

ANY DEVICE

Phone, tablet, or computer; fully responsive.

ALL FILE TYPES

PDF, HEIC, images, Word — up to 25 MB each.

E-SIGNABLE

Draw or type; E-SIGN/UETA compliant.

ON-BRAND

Real HHFCU logo & colors.

3 SECURITY & COMPLIANCE POSTURE

- Designed to send applications **only to Heritage Hub FCU's own secure endpoint** — sensitive data (SSN, IDs) is **not** routed through any third-party service.
- Supports the credit union's **BSA / Beneficial Ownership (31 CFR §1010.230)** and **USA PATRIOT Act** obligations; consent, verification, and e-sign audit language are built in.
- Until connected, the live form runs in a **safe review mode** that transmits nothing — safe to circulate for review today.

4 STATUS & ACCESS

Both forms (simple + full) built	✓ Complete	Document upload + camera capture	✓ Complete
E-signature (draw/type + audit)	✓ Complete	Brand match (logo + colors)	✓ Complete
Live preview link + standalone file	✓ Delivered	Connect to HHFCU backend endpoint	🟡 Pending (CU IT)

Live preview: <https://nubridgemd1.github.io/hhfcu-intake/> | Developer spec: BACKEND-INTEGRATION.md (in the delivery package)

5 TO GO LIVE

One step remains: the credit union's web/IT team hosts the page on its own site (or embeds it) and sets a single configuration line — the secure **submit endpoint** that receives the application and files. A copy-paste developer specification (field names, file parts, sample server code, security requirements) has been provided. No other changes are required; hosting and HTTPS are already in place on the credit union's website.
